## COURSEWORK / SKILLS

**Coursework:** Data Structures & Algorithms, Object Oriented Programming, Database Management System
**Languages:** C/C++, Java, HTML, CSS, JavaScript
**Frameworks/Technologies:** ReactJS, Firebase, Tailwind CSS
**Tools:** Git, GitHub **Database:** MySQL

## PROJECTS

**GitHub Profile Finder** ⤴ | HTML, CSS, Javascript, GitHub API
Live Demo

- Search for GitHub users by their username.
- View the user's profile information, including their avatar, name, bio, location, and public repositories.
- Click on a repository to see more details like the repository name, description, and the number of stars.

**Chat Application** ⤴ | React Js, Firebase
Live Demo

- Designed and implemented real-time chat functionality with Firebase, ensuring seamless communication and instant message delivery for enhanced user experience.

**Color Picker Extension** ⤴ | Javascript
Live Demo

- A color picker allows you to easily capture RGB values and HEX color codes from your screen with a simple click on the desired color.
- This intuitive tool allows users to effortlessly select and experiment with a wide spectrum of colors, enriching their web experience.

## ACHIEVEMENTS

- AMCAT Qualified.
- Solved over 300+ problems on various platforms like Leetcode, GFG

## CERTIFICATIONS

- A Job Ready Bootcamp in C++, DSA and IOT By Saurabh Shukla Sir - Ineuron

## EDUCATION
